Experience

TikTok **NOV 2023 - PRESENT**

Software Engineer

- Led backend architecture redesign for a global content platform serving 200M+ users across 41 countries, enabling 40+ major campaign launches in H1 2025.
- Built modular, self-service systems that cut feature delivery time by 85% and reduced in-app campaign setup time from 7+ days to <1 day, empowering non-technical teams to launch independently.
- Designed and scaled a real-time interaction tracking framework for high-traffic events, processing millions of concurrent short video interactions without service degradation.
- Integrated AI-driven planning systems leveraging trend data and LLMs, reducing campaign ideation cycles by up to 10 days.
- Delivered global initiatives generating 32M+ user submissions and 9.6M new user signups in six months through globally visible partnerships and content activations.
- Recognized for technical leadership with 3× performance awards and for mentoring engineers to deliver production-grade features within weeks.

Google **AUG 2022 - MAR 2023**

Software Engineer

- Developed a firmware update delivery system for millions of remotes via Google Play Store on Chromecast devices running Android TV operating system.
- Built and tested an internal tool in Kotlin to summarize changes in pre-release device firmware builds across all Google Nest branded products.
- Increased JUnit test coverage by 75% on code responsible for receiving and verifying signed certificates on Chromecast devices.

Amazon **MAY 2021 - AUG 2021**

Software Development Engineer Intern

- Designed and built on-device testing functionality for the Amazon One Android platform based on requirements from the Research team using Java and Dagger, enhancing overall platform performance and reliability.
- Created customer-facing modal windows in React to securely parse and transmit sensitive biometric data to a remote service.
- Implemented features in a Coral web service with methods for relaying JSON payloads to IoT Android devices via MQTT.

Farm Generations **JUL 2020 - SEP 2020**

Frontend Developer Intern

- Worked on an Agile development team to build a consumer-facing farm discovery and shopping portal in React Native.
- Integrated Stripe API integration into an existing farm management app to accept payments and manage user transactions.

Soracom Global Inc. **JUN 2019 - JAN 2020**

Software Engineer Intern

- Created an Android app with React Native to remotely manage an electric scooter while reducing data costs by 66%.
- Co-authored technical articles on *Hacker Noon* with hundreds of hours read and starred in demonstration videos on YouTube.

Education

University of California, Berkeley **AUG 2018 - MAY 2022**

Bachelor of Arts, Major: Computer Science | Minor: Music

Relevant Coursework: Algorithms, Data Structures, Computer Security, Machine Structures, Operating Systems, Information Devices and Systems, Deep Neural Networks, Database Systems, Principles and Techniques of Data Science

Technical Skills

Technologies: MongoDB, PostgreSQL, Thrift, FX, Mockito, Flask, Android, Linux kernel, REST APIs, Node.js, React + React Native, GraphQL, Git, Protocol Buffers

Languages: Go (Golang), HTML5/CSS/JavaScript, Typescript, SQL, Java, Kotlin, Python, C/C++
